Period fo	The MAILING DATE of this communication app or Reply	ears on the cover sheet with the c	orrespondence address			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status

DETAILED ACTION

Receipt of the drawings filed 10/11/05 is acknowledged. These drawings have not been approved since no annotated sheets were filed. These new drawings appear to contain new matter. For example note numerals 178 and 176 added to new figure 2 do not appear in original figure 2. The drawing objection set forth in the Office action mailed 04/05/05 is herein repeated.

Claims 36-60 stand cancelled in view of applicants' claim identifier (Previously cancelled) on page 22.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 2-10 and 14-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claims 2-10, it is unclear how "a determination" in each of these claims is provided.

Regarding claims 14-27, it is unclear how the structures therein are controlled by the controller and/or how the signals are processed.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 09/830,005

Art Unit: 3652

Claims 2-10, 13, 14, 20, 25 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 2-10, 14, 20, 25 and 26, it is unclear what structure these claims add. Clarification is required.

Regarding claim 13, it is unclear whether this claim includes a baler and/or a tractor. Note line1 of the claim and lines 5-7.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-15 and 17-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over the known baler system disclosed by applicants in lines 22-31 on page 1 of their specification or in Lundahl, et al. in view of newly cited Eecke, et al. or Vellius and/or Hale, et al.

The known baler system is manually operated as is the baler system in Lundahl.

Each baler system is disclosed as containing a pick up, baler and accumulator.

Lundahl and Vellius disclose automated systems as claimed by applicants for farm equipment.

It would have been obvious to substitute an accumulator as taught by Eecke for the accumulator in the baler system disclosed by applicants or Lundahl. Application/Control Number: 09/830,005

Art Unit: 3652

It would also have been obvious to replace the controls in the known baler system or in Lundahl with controls as claimed in view of the automatic controls in Vellius and/or Hale since it would involve only routine skill to replace manual means with mechanical or automatic means which accomplish the same result. See in re Venner, 120 USPQ 192.

Applicants' arguments regarding the art rejections have been carefully considered but are not deemed persuasive since the baler system of each primary reference comprises an accumulator and the claims do not preclude the pick up and baler and tractor also present in these baler systems. Moreover, accumulators are standard farm equipment and one would be led by that fact to use the system in Vellius in any system comprising standard farm equipment including a system comprising an accumulator. As for Hale combines contain accumulators rendering the use of his system and that in Vellius in the disclosed system or the system in Lundal obvious.

Applicants' comments regarding their disclosure have been carefully considered but are not deemed persuasive. First pages 101-111 do not contain sections XII and XIII. Further these pages do not set forth the specifics claimed and rejected in the 112 rejections.

Claims 31-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP

Art Unit: 3652

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donald Underwood whose telephone number is 571-272-6933. The examiner can normally be reached on Mon-Thursday 7:30-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eileen D. Lillis can be reached on 571-272-6928. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
